

Standards of Care: Master the Core Elements of LTC Clinical Excellence

This 12 month webinar series focuses on nursing facility systems of care and managing common conditions treated in the LTC setting. Each session addresses standards of care, staff training/ competency focus areas, critical nursing assessment/ documentation principles, care planning guidance, recommended QA activities, and practical daily operations guidance with extensive use of case examples. Recordings of live sessions are included with the webinar purchase.

Proactive Training Team:

The Proactive clinical education team includes experienced health facility administrator, legal nurse consultant, compliance officer, MDS and reimbursement experts with backgrounds in multi-facility operations, contract therapy services, survey management, healthcare compliance, clinical program development, QAPI, and litigation support.

MEDICAL REVIEW

Standards of Care: Master the Core Elements of LTC Clinical Excellence

1/20/2021

Something Seems Off — Identifying Changes in Condition

Apply best practices for identifying, communicating, and monitoring changes in condition to ensure optimal resident outcomes and reduce hospitalizations.

2/17/2021

Fall Prevention and Management

Apply concepts of effective root cause analysis for falls to improve care planning strategies.

3/17/2021

Reducing Infections in Long-Term Care Facilities

Review strategies to reduce infection rates and manage outbreaks with a focus on standards of care, staff competency focus areas, and critical nursing assessment principles.

4/21/2021

Care of the Dialysis Recipient

Review requirements specific to residents receiving in-house or offsite dialysis with guidance on pre and post treatment monitoring protocols.

5/19/2021

Breathe Easy — Respiratory Care and Services

Meet standards for respiratory care programming including oxygen therapy, tracheostomy and ventilator care, and MDI and nebulizer administration.

6/16/2021

Skin/Wound Care, Pressure Ulcer Prevention

Examine skin management and wound prevention strategies, along with standards of care for preventing and treating pressure injuries/ulcers.

7/21/2021

Depression, Anxiety and Trauma Informed Care

Manage depression and anxiety in the LTC setting and implement a trauma informed care approach.

8/18/2021

Dementia Care, Behavioral Health, and Antipsychotic Reduction

Best practices for Dementia and behavioral health care and strategies for reducing antipsychotics through non-pharmacological interventions.

9/15/2021

Pain

Clinical standards and regulatory requirements related to assessment, management and documentation of pain, along with potential consequences of poorly managed pain.

10/20/2021

End of Life Care — Hospice and Palliative Services

Understand the similarities and differences between hospice and palliative care, as well as effective systems for collaboration with hospice providers.

11/17/2021

Nutrition, Hydration, and Weight Loss

Best practices for systems related to nutrition and hydration, and strategies for reducing weight loss in LTC facilities.

12/15/2021

Incontinence, UTI, and Catheters

Assessment and management of incontinence, catheter use, and the infection classification criteria for UTIs.
